

Well and water information **265630 Side Road 25**

The well is drilled to 70'. Water was hit at approximately 50'. The pump is sitting at 60'. We have 6.5 gallons per minute. The Well was newly drilled in 2021.

The water treatment system was designed by Carature Water Group in Cambridge and manufactured in Canada. This is a commercial reverse osmosis system with capability of 1200 gallons per day with a 300 gallon clean water reservoir tank in the basement to handle all the demands of multiple points drawing water at the same time. Iron filter, water softener and uv light sanitation are all part of the design by Carature. Multiple sediment filters both pre and post treatment. Grundfos pressure and well pumps.
